MATERIAL INFORMATION

Panels:

Volkern® Polyrey is a massive self-supporting construction panel made of thermosetting resins, homogeneously reinforced with cellulose fibre. Both sides of the panel have a slightly structured, decorative surface.

The composition and structure of this panel have been developed especially to comply with the extreme demands in sanitary rooms. Moisture resistance is one of the main trumps of Volkern® Polyrey. The edges can, without any special finishing, withstand water and moisture. Moreover, this panel still offers many other advantages i.e.: excellent chemical resistance, highly shock-and scratch resistant and graffiti can be easily removed, etc. Additives have been added to the top layer. As a result, the panel is antibacterial (Sanitized certificate on demand).

Nylon accessories:

The nylon accessories (PA) are unbreakable, coloured in mass and resistant to very high temperatures and chemicals. The hinges supports are reinforced with a steel core.

Aluminium profiles:

The extruded aluminium profiles are manufactured from a AlMgSi-alloy and oven-lacquered with polyester powder (+/- 60 microns).

SYSTEM FEATURES

*Total height front and side wall: 202,5 cm incl. supports and stabilization profile. Total height intermediate wall: 197,5 cm incl. free height of 15 cm.
